

# The Bioplicity Scientific Writing Workshop

The following is a list of the contents for a 2.5-day workshop.\*  
Depending on need, various sections can be expanded or removed.

Some Elements of Style – Getting started with Strunk and White

What is plagiarism?

The Task of Writing a Research Article

- Getting organized
- Making a plan
- Designing tables and figures
- Structuring and writing your article
- Writing an impactful abstract
- Citing other research

The Mechanics of Writing

- Organizing sentences and paragraphs
- Setting up strong transitions
- Avoiding wordiness
- Choosing the correct tense
- Punctuating correctly
- Emphasizing key points

Principles of Self-Editing and Reflection

- Does my article say what I intended to say?
- Is my article structured appropriately?
- Is my language strong and cohesive?
- How can I improve my writing on my own?

Please write to [info@bioplicityediting.org](mailto:info@bioplicityediting.org) to schedule a consultation.
